Sommario/riassunto	Sherman Jackson offers a trenchant examination of the career of Islam among the blacks of America. Jackson notes that no one has offered a convincing explanation of why Islam spread among Blackamericans (a coinage he explains and defends) but not among white Americans or Hispanics. The assumption has been that there is an African connection. In fact, Jackson shows, none of the distinctive features of African Islam appear in the proto-Islamic, black nationalist movements of the early 20th century. Instead, he argues, Islam owes its momentum to the

Sommario/riassunto	The emission of dibenzofurans and dioxins from industrial processes is a major environmental concern. Focussing on dibenzofuran, this study tend to improve our understanding of the general oxidation chemistry and to provide a mechanism suitable for future modelling studies. Based on quantum chemical methods, energies, chemical structures and reactions are calculated numerically. Not only stable molecules and radicals, but also transition states are reported in this work.
