Sommario/riassunto

This is an essential/must-have resource for anyone who is interested in natural language acquisition, the development of reading, and academic achievement of deaf and hard of hearing children. It is a compilation of research and practical applications of cued speech and cued language, authored by 39 authors from nine different fields of study (speech science, hearing science, linguistics, psycholinguistics, neurolinguistics, cognition, transliteration, computer science, and deaf education) in four countries.
