Sommario/riassunto	Rheumatology Practice in Occupational Therapy is a valuable new

handbook focusing on the core area of rheumatology. It provides practical guidance to help occupational therapists treat and manage rheumatic disease in both clinical and community settings and emphasizes a contemporary 'client-centred' approach as a fundamental requirement of effective and rewarding OT practice. Drawing upon personal, clinical and theoretical perspectives, it equips the reader with an understanding not only of relevant practical skills but of the clinical reasoning required to modify and apply these skills.

Includes bibliographical references and index.

An introduction to sexuality as subject matter -- Our lived experience as the subject of research -- Historicity and temporality -- Semiotics in communicology -- Phenomenology in communicology -- Semiotic phenomenology -- Semiotic phenomenology applied -- Cultural ethics and personal obligations.

Sommario/riassunto

Jacqueline M. Martinez's *Communicative Sexualities: Queer and Feminist Theories in Practice* provides an argument for the direct study of our lived-experiences of sexuality in a classroom or academic setting. It illustrates how communicology, and its methodological practice of semiotic phenomenology, allows for a sustained and rigorous study of the meaningfulness of sexual experience as it becomes manifest in the immediate, concrete and embodied realities in the lives of those taking up such a study. Extended examples from actual classroom experience are used generously throughout.
