Sommario/riassunto	The term translingual highlights the reality that people always shuttle across languages, communicate in hybrid languages and, thus, enjoy multilingual competence. In the context of migration, transnational economic and cultural relations, digital communication, and globalism, increasing contact is taking place between languages and communities. In these contact zones new genres of writing and new textual conventions are emerging that go beyond traditional dichotomies that treat languages as separated from each other, and texts and writers as determined by one language or the other.
