Sommario/riassunto	The educational field of "Global Studies" emphasises the management of global governance in a forward-looking manner. This eBook includes contributions from a variety of authors from Eastern and Western Europe who describe the criteria, quality assessment, targets, processes, educational endeavours, and technological underpinnings of globalisation - practically all of which play a role in institutionalised "Global Studies". Topics cover a wide-ranging set of issues from journal rankings to immigration and gender representations in the media, all

within a global context.
