Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	This report shows that decent work is vital to reducing poverty. Poverty has tended to decline in many emerging and developing countries, whereas it has tended to increase in the majority of advanced economies, including in terms of working poverty. The report examines the role that policy can play, particularly with economic policies, employment programmes, enterprise development, social protection and social dialogue. It also discusses the role of international labour standards.
