Sommario/riassunto	"Twenty-three contributions by leading archaeologists from across Europe explore the varied forms, functions and significances of fortified settlements in the 8th to 10th centuries AD. These could be sites of strongly martial nature, upland retreats, monastic enclosures, rural seats, island bases, or urban nuclei. But they were all expressions of control--of states, frontiers, lands, materials, communities--and ones defined by walls, ramparts or enclosing banks. Papers run from Irish cashels to Welsh and Pictish strongholds, Saxon burhs, Viking fortresses, Byzantine castra, Carolingian creations, Venetian barricades, Slavic strongholds, and Bulgarian central places, and coverage extends fully from north-west Europe, to central Europe, the northern Mediterranean and the Black Sea. Strongly informed by recent fieldwork and excavations, but drawing also where available on the documentary

record, this important collection provides fully up-to-date reviews and analyses of the archaeologies of the distinctive settlement forms that characterised Europe in the Early Middle Ages"--From publisher's website.

Sommario/riassunto	This book is a special edition, compiled for to the MSc Course Research Methodologies as taught at the Faculty of Aerospace Engineering at Delft University of Technology. It is a compilation of useful chapters from several sources on how to structure, set up, carry out and write up your (thesis) research to aid you in writing your research plan. Next to

that it acts as a companion during your thesis research. After introducing you to the philosophy of scientific research, subsequent chapters each contribute to the different phases of your research. The book uniquely allows for the often multi- or interdisciplinary research many of you carry out, based on the established Dutch university tradition of (semi-)independent student research, creating a thread through the process for you to follow. This edition is a collection of chapters from *An Introduction to Interdisciplinary Research* (2016), edited by Steph Menken and Machiel Keesstra, and *Academic Skills for Interdisciplinary Studies. Revised edition* (2019), by Koen van der Gaast, Laura Koenders and Ger Post, published by Amsterdam University Press.
