| Nota di contenuto | Preliminary Material -- 1 Introduction -- 2 Geography and Politics -- 3 Land, Society, and Empire (Through 1576) -- 4 The Collapse of Rural Order: A Comparison (1576–1643) -- 5 What Happened? An Assessment -- 6 Conclusion -- Appendix i: Tahrir and Avârz Registers of Amasya -- Appendix ii: Revenue Holders and Revenue Distribution -- Appendix iii: Urban Population in the Province of Rûm, 1520–1643 -- Appendix iv: Rural Settlements with their Tax-Paying Population (c. 1480–1643) -- Bibliography -- Index. |
| Sommario/riassunto | Did the 'seventeenth-century crisis' visit the Ottoman Empire? How can we situate the explosion of rural violence and the rebellions of the turn of the seventeenth century in the Anatolian countryside? The Collapse of Rural Order in Ottoman Anatolia provides the reader with a fresh and innovative perspective on the long scholarly debate over the question of 'decline' in early modern Ottoman history. It offers a new agenda, new type of source material, and a new methodology for the study of demographic crisis. Through a systematic examination of little-known detailed avârz registers, Oktay Özel demonstrates in detail the mass desertion of rural settlements, the destruction of agricultural economy, and the resulting collapse of rural order in Ottoman Anatolia at the turn of the seventeenth century. |

| Sommario/riassunto | These proceedings contain the refereed full technical papers presented at the 26th Annual European Conference on Information Retrieval (ECIR 2004). ECIR is the annual conference of the British Computer Society's specialist group in Information Retrieval. This year the conference was held at the School of Computing and Technology at the University of Sunderland. ECIR began life as the Annual Colloquium on Information Retrieval Research. The colloquium was held in the UK each year until 1998 when the event was held in Grenoble, France. Since then the conference venue has alternated between the United Kingdom and |

Continental Europe, and the event was renamed the European Conference on Information Retrieval. In recent years, ECIR has continued to grow and has become the major European forum for the discussion of research in the field of Information Retrieval. To mark this metamorphosis from a small informal colloquium to a major event in the IR research calendar, the BCS-IRSG decided to rename the event to the European Conference on Information Retrieval. ECIR2004 received 88 full paper submissions, from across Europe and further a field including North America, China and Australia, a testament to the growing popularity and reputation of the conference. Out of the 88 submitted papers, 28 were accepted for presentation. All papers were reviewed by at least three reviewers. Among the accepted papers 11 have a student as the primary author, illustrating that the traditional student focus of the original colloquium is alive today.
