Military Expenditure and Interstate Conflict -- 8.Military Expenditure

and National Security -- 9.Conclusion.

Sommario/riassunto

"The twin objectives of this book are to identify the determinants and to explore the implications of Third World military expenditure. Beginning with a descriptive profile of Third World military expenditure, the study uses cross-national and longitudinal data to explore the determinants and implications across a range of issues areas. On the basis of this analysis, the book concludes with an empirical theory of military expenditure and a critical appraisal of the general implications."--Bloomsbury Publishing.
