Sommario/riassunto	We experience violence all our lives, from that very first scream of birth. It has been industrialized and domesticated. Our culture has not become accustomed to all violence, to be sure; but enough violence, nonetheless: more than enough, perhaps. Geographies of Violence is a critical human geography of the history of violence, from Ancient Rome and Enlightened wars through to natural disasters, animal slaughter, and genocide. Written incredible insight and flair, this is a thought-provoking text for human geography students and researchers alike.
