Disciplina	149/.73
Soggetti	Science - Philosophy Science - History Relativity Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter -- Contents -- Preface -- Note to the Reader -- 1. Progress and Cumulativity -- 2. Theory-ladenness and Underdetermination -- 3. Holism -- 4. Standards of Success -- 5. Incommensurability -- 6. Interests and the Social Determinants of Belief -- References -- Index
Sommario/riassunto	In recent years, many members of the intellectual community have embraced a radical relativism regarding knowledge in general and scientific knowledge in particular, holding that Kuhn, Quine, and Feyerabend have knocked the traditional picture of scientific knowledge into a cocked hat. Is philosophy of science, or mistaken impressions of it, responsible for the rise of relativism? In this book, Laudan offers a trenchant, wide-ranging critique of cognitive relativism and a thorough introduction to major issues in the philosophy of knowledge.
