Record Nr. UNINA9910466667403321 Inevitably Toxic [[electronic resource]]: Historical Perspectives on **Titolo** Contamination, Exposure, and Expertise / / edited by Brinda Sarathy. Vivien Hamilton and Janet Farrell Brodie Pittsburgh, Pa., : University of Pittsburgh Press, [2018] Pubbl/distr/stampa **ISBN** 0-8229-8623-X Edizione [1st ed.] Descrizione fisica 1 online resource (328 pages) Intersections: histories of environment, science, and technology in the Collana anthropocene 363.7309 Disciplina Soggetti **Pollutants** Pesticides - Environmental aspects Factory and trade waste - History Radiation - History Pollution - History Electronic books. Lingua di pubblicazione Inglese Materiale a stampa **Formato** Livello bibliografico Monografia Nota di bibliografia Includes bibliographical references and index. Nota di contenuto Introduction: toxicity, uncertainty, and expertise / Vivien Hamilton and Brinda Sarathy -- part one. Radiation. X-ray protection in American hospitals / Vivien Hamilton -- Contested knowledge: the Trinity test radiation studies / Janet Farrell Brodie -- Crossroads in San Francisco : the Naval Radiological Defense Laboratory and Its afterlives / Lindsey Dillon -- Born opaque: investigating the nuclear accident at the Santa Susana Field Laboratory / William Palmer -- part two. Industrial toxins. Making way for industrial waste: water pollution control in Southern California, 1947-1955 / Brinda Sarathy -- Processing the past into your future: uncovering the hidden consequences of industrial development in the West Texas petrochemical industry / Sarah Stanford-McIntyre --

Vast, incredible damage: herbicides and the U.S. Forest Service / James

environmental justice in Los Angeles / Bhavna Shamasunder -- part three: Community contestation, expanding expertise. Atomic bomb survivors, medical experts, and the endlessness of radiation illness /

G. Lewis and Char Miller -- Neighborhood oil drilling and

Naoko Wake -- On sovereignty, deficits, and dump fires: risk governance in an Arctic "dumpcano" / Alexander Zahara -- Epilogue containment: discussing nuclear waste with Peter Galison / interview by Vivien Hamilton and Brinda Sarathy.

## Sommario/riassunto

Not a day goes by that humans aren't exposed to toxins in our environment--be it at home, in the car, or workplace. But what about those toxic places and items that aren't marked? Why are we warned about some toxic spaces' substances and not others? The essays in Inevitably Toxic consider the exposure of bodies in the United States, Canada and Japan to radiation, industrial waste, and pesticides. Research shows that appeals to uncertainty have led to social inaction even when evidence, e.g. the link between carbon emissions and global warming, stares us in the face. In some cases, influential scientists, engineers and doctors have deliberately "manufactured doubt" and uncertainty but as the essays in this collection show, there is often no deliberate deception. We tend to think that if we can't see contamination and experts deem it safe, then we are okay. Yet, having knowledge about the uncertainty behind expert claims can awaken us from a false sense of security and alert us to decisions and practices that may in fact cause harm.
