Sommario/riassunto	In search of specific national traditions nineteenth-century artists and scholars did not shy of manipulating texts and objects or even outright manufacturing them. The essays edited by János M. Bak, Patrick J. Geary and Gábor Klaniczay explore the various artifacts from outright forgeries to fruits of poetic phantasy, while also discussing the volatile notion of authenticity and the multiple claims for it in the age. Contributors include: Pavlína Rychterová, Péter Dávidházi, Pertti Anttonen, László Szörényi, János M. Bak, Nóra Berend, Benedek Láng, Igor P. Medvedev, Dan D.Y. Shapira, János György Szilágyi, Cristina La Rocca, Giedr Micknait, Johan Hegardt and Sándor Radnóti.

Sommario/riassunto

Anaphora processing is a central topic in the study of natural language and has long been the object of research in a wide range of disciplines. The correct interpretation of anaphora has also become increasingly important for real-world natural language processing applications, including machine translation, automatic abstracting, information extraction and question answering. This volume provides a unique overview of the processing of anaphora from a multi- and interdisciplinary angle. It will be of interest and practical use to readers from fields as diverse as theoretical linguistics, corpus linguistics, computational linguistics, computer science, natural language processing, artificial intelligence, human language technology, psycholinguistics, cognitive science and translation studies. The readership includes but is not limited to university lecturers, researchers, postgraduate and senior undergraduate students.
