

1. Record Nr.	UNINA9910466877003321
Autore	Hovestadt Ludger
Titolo	A genius planet : energy: from scarcity to abundance, a radical pathway // Ludger Hovestadt, Vera Buhlmann, Sebastian Michael
Pubbl/distr/stampa	Basel, Switzerland : , : Birkhauser Verlag GmbH, , 2017
ISBN	3-0356-1419-9 3-0356-1421-0
Descrizione fisica	1 online resource (264 pages) : illustrations
Collana	Applied Virtuality Book Series ; ; 11
Disciplina	724.6
Soggetti	Renewable energy sources Energy development Energy consumption Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references (pages 257-264).
Nota di contenuto	Genius -- The Task in Hand -- Energy Is Not the Problem -- Quick Refresher on Electricity -- The Network: Sharing Power -- Making it Happen: A Turnkey Technology -- Three Case Studies -- The Bigger Picture -- A Planet in Crisis: Intellect to the Rescue -- The Outlook: What Next?
Sommario/riassunto	Imagine a world where the power is always on, where there is not just enough energy, but an abundance of it. Such a world is no Utopia, it is a possible reality. Using indefinitely available sources of energy – especially photovoltaic solar, in combination with others – and networking this energy, much in the way that we have networked information, we can get beyond our current energy ‘crisis’ and resolve it. The world we then find ourselves in is not a world without problems – we will face new challenges on the way – but in terms of energy it is a world of plenty. Rooted in sound theory and based on technology that is available now, A Genius Planet offers an accessible but detailed and insightful perspective on how we can free ourselves from our dependency on natural resources and generate, trade, and use energy in ways that open up the genuine potential that we have at our disposal today.
