1. Record Nr. UNINA9910466907303321

Autore	Xu Qian <1985->
Titolo	Anechoic and reverberation chambers : theory, design and measurements / / Qian Xu, College of Electronic and Information Engineering, Nanjing University of Aeronautics and Astronautics, Nanjing, China, Yi Huang, The University of Liverpool, Liverpool, UK
Pubbl/distr/stampa	Hoboken, New Jersey, USA : , : Wiley-IEEE Press, , 2018 [Piscataqay, New Jersey] : , : IEEE Xplore, , [2018]
ISBN	1-119-36205-9 1-119-36202-4
Descrizione fisica	1 online resource (381 pages)
Disciplina	621.3028/7
Soggetti	Anechoic chambers Electromagnetic reverberation chambers Electromagnetic measurements Electromagnetic waves - Transmission Shielding (Electricity) Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	About the Authors xi -- About the Contributors xiii -- Acknowledgements xv -- Acronyms xvii -- 1 Introduction 1 -- 1.1 Background 1 -- 1.1.1 Anechoic Chambers 1 -- 1.1.2 Reverberation Chambers 3 -- 1.1.3 Relationship between Anechoic Chambers and Reverberation Chambers 6 -- 1.2 Organisation of this Book 6 -- References 8 -- 2 Theory for Anechoic Chamber Design 11 -- 2.1 Introduction 11 -- 2.2 Absorbing Material Basics 11 -- 2.2.1 General Knowledge 11 -- 2.2.2 Absorbing Material Simulation 14 -- 2.2.3 Absorbing Material Measurement 16 -- 2.3 CEM Algorithms Overview 22 -- 2.4 GO Theory 23 -- 2.4.1 GO from Maxwell Equations 23 -- 2.4.2 Analytical Expression of a Reflected Field from a Curved Surface 24 -- 2.4.3 Alternative GO Form 28 -- 2.5 GO-FEM Hybrid Method 29 -- 2.6 Summary 30 -- References 30 -- 3 Computer-aided Anechoic Chamber Design 35 -- 3.1 Introduction 35 -- 3.2 Framework 35 -- 3.3

Sommario/riassunto

A Comprehensive Review of the Recent Advances in Anechoic Chamber and Reverberation Chamber Designs and Measurements Anechoic and Reverberation Chambers is a guide to the latest systematic solutions for designing anechoic chambers that rely on state-of-the-art computational electromagnetic algorithms. This essential resource contains a theoretical and practical understanding for electromagnetic compatibility and antenna testing. The solutions outlined optimise chamber performance in the structure, absorber layout and antenna positions whilst minimising the overall cost. The anechoic chamber designs are verified by measurement results from Microwave Vision Group that validate the accuracy of the solution. Anechoic and Reverberation Chambers fills an important gap in the literature by providing a comprehensive reference to electromagnetic measurements, applications and over-the-air tests inside chambers. The expert contributors offer a summary of the latest developments in anechoic and reverberation chambers to help scientists and engineers apply the most recent technologies in the field. In addition, the book contains a comparison between reverberation and anechoic chambers and identifies their strengths and weaknesses. This important resource: . Provides a systematic solution for anechoic chamber design by using state-of-the-art computational electromagnetic algorithms. Examines both types of chamber in use, comparing and contrasting the advantages and disadvantages of each. Reviews typical over-the-air measurements and new applications in reverberation chambers. Offers a timely and complete reference written by authors working at the cutting edge of the technology. Contains helpful illustrations, photographs, practical examples and comparisons between measurements and simulations Written for both academics and industrial engineers and designers, Anechoic and Reverberation Chambers explores the most recent advances in anechoic chamber and reverberation chamber designs and measurements.
