Nota di contenuto	Frontmatter -- Foreword -- Vietnam's Industrialization Ambitions: The Case of Vingroup and the Automotive Industry
Sommario/riassunto	Vietnam has officially admitted its failure to achieve industrialized economy status by 2020. This failure is partly due to its inability to grow a strong local manufacturing base and develop key strategic industries. The participation of Vingroup, the country's largest private conglomerate, in the automotive industry has sparked new hopes for Vietnam's industrialization drive. The company, through its subsidiary Vinfast, aims to become a leading automaker in Southeast Asia with an annual capacity of 500,000 units and a localization ratio of 60 per cent by 2025. Challenges that Vinfast faces include its unproven track record in the industry; the limited size of the national car market; the lack of infrastructure to support car usage in Vietnam; the intense competition from foreign brands; and its initial reliance on imported technologies and know-hows. However, Vinfast enjoys certain advantages in the domestic market, including the large potential of the Vietnamese automotive market; its freedom as a new automaker to define its business strategies without having to deal with legacy issues; Vingroup's sound business and financial performance and its ecosystem; strong support from the Vietnamese government; and

nationalist sentiments that will encourage certain Vietnamese customers to choose its products. If Vinfast is successful, it will boost Vietnam's GDP growth and reinvent the country's automotive industry. Its success will also contribute significantly to the realization of Vietnam's industrialization ambitions and bring private actors into the centre stage of the economy. If the company fails, however, it will cause considerable problems for both Vingroup and the Vietnamese economy.

3. Record Nr.	UNISA996206396803316
Autore	Kaye Frances W.
Titolo	Goodlands : a meditation and history on the Great Plains / / Frances W. Kaye

Norris, Tommy Douglas, and the Great Plains -- Planning and economic theory -- Mouse beans and drowned rivers -- Oil -- Arts, justice, and hope on the Great Plains -- Conclusion.

Sommario/riassunto

Amer-European settlement of the Great Plains transformed bountiful Native soil into pasture and cropland, distorting the prairie ecosystem as it was understood and used by the peoples who originally populated the land. Settlers justified this transformation with the unexamined premise of deficiency, according to which the Great Plains region was inadequate in flora and fauna and the region lacking in modern civilization. Drawing on history, sociology, art, and economic theory, Frances W. Kaye counters the argument of deficiency, pointing out that, in its original ecological state, no region can possibly be incomplete. Goodlands examines the settlers' misguided theory, discussing the ideas that shaped its implementation, the forces that resisted it, and Indigenous ideologies about what it meant to make good use of the land. By suggesting methods for redeveloping the Great Plains that are founded on native cultural values, Goodlands serves the region in the context of a changing globe.
