

1. Record Nr.	UNINA9910467143403321
Titolo	Innovative materials and design for sustainable transportation infrastructure : selected papers from the International Symposium on Systematic Approaches to Environmental Sustainability in Transportation // sponsored by Center for Environmentally Sustainable Transportation in Cold Climates ; The Construction Institute of the American Society of Civil Engineers ; Transportation Research Board ; Frontiers of Structural and Civil Engineering, China ; editors, Sheng Zhao, Ph.D., Jenny Liu, Ph.D., P.E., Xiong Zhang, Ph.D., P.E
Pubbl/distr/stampa	Reston, Virginia : , : American Society of Civil Engineers, , 2015 ©2015
ISBN	1-68015-936-4 0-7844-7927-5
Descrizione fisica	1 online resource (425 p.)
Disciplina	629.04
Soggetti	Transportation engineering Sustainable engineering Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	""Cover""; ""Contents""; ""Context Sensitive Solutions in Pavement Materials""; ""Effect of Conductive Filler Size and Type on Thermal Properties of Asphalt Mixtures""; ""Anti-Oxidants' Effect on Bitumen Rheology and Mixes' Mechanical Performance""; ""Linking the Field and Lab Performance of Interstate Pavements""; ""Study on the Classification and Evaluation Method of the Frost Susceptibility of Rock Mass""; ""Deicer Impacts on Concrete Bridge Decks: A Comparative Study of Field Cores from Potassium Acetate and Sodium Chloride Environments"" ""Evaluation of Cleaning Methods of Pervious Concrete Pavement"" Carbon Sequestration in Old and New Portland Cement Concrete Pavement Interiors""; ""Evaluating the Freeze Thaw Durability of Pervious Concrete Mixed with Silica Fume""; ""The Durability of Sulfate

Resisting Cement Concrete Made with Fly Ash or Slag"; "Case Study: Application of Mineral Admixtures in Cement Concrete under a Sulfate Environment in Northwest China"; "Evaluation of Self-Healing Properties of Mortar Containing Microencapsulated Epoxy Resin"; "Investigation of an Agent's Transportation in Microcapsule Self-Healing Concrete"; "Experimental Study of Compaction Behaviors and Assessment of Berm Materials"; "Modified Media Filter Drain Mix with Alternate Aggregate Grading"; "Geo-Materials, Soil Stabilization, and Ground Improvement"; "Implementation of an Elasto-Viscoplastic Model of Geosynthetics in ABAQUS"; "Nonexistence and Non-Decoupling of the Dissipative Potential for Geo-Materials"; "Development of an Oedometer Cell with Suction Measurement Ability"; "Exploring a Chemo-Mechanical Approach to Understand the Expansive Behavior of Sulfate Bearing Soils"; "Mechanical Properties and an Empirical Model of Compacted Silty Clay Subjected to Freeze-Thaw Cycles"; "Review of the Characterization of Geotextile Hydraulic Behavior"; "Accuracy and Sensitivity Analyses on the Photogrammetry-Based Deformation Measurement Method"; "Mechanical Behaviors of Cylindrical Retaining Structures in Ultra-Deep Excavations"; "Experimental Study on the Mechanical Properties of CAS-1 Lunar Regolith Stimulant under Low Stress Levels"; "Geo-Treatments in Constructing a Tunnel in Karst Strata: Lessons Learned from a Subway Project in Guangzhou, China"; "Bolted and Seeded-Geomat Protection System to Reduce the Erosion Rate of High and Steep Slopes"; "Geosynthetic-Stabilized Vegetated Earth Surfaces for Environmental Sustainability in Civil Engineering"; "Sustainable Design in Underground Space, Tunneling, and Railway Engineering"; "Structural Performance of an Immersed Tunnel Element at a Flexible Joint"; "Factors Influencing the Longitudinal Deformation of a Metro Tunnel in Soft Deposit: An Overview"; "Analytical Approaches of the Long-Term Behavior of a Shield Tunnel in Soft Deposit Due to Groundwater Leakage: A Review"
