

1. Record Nr.	UNINA9910467244903321
Autore	Altmann Gabriel
Titolo	Forms and degrees of repetition in texts : detection and analysis / / Gabriel Altmann, Reinhard Kohler
Pubbl/distr/stampa	Berlin ; ; Boston : , : De Gruyter Mouton, , [2015] ©2015
ISBN	3-11-041202-0
Descrizione fisica	1 online resource (220 p.)
Collana	Quantitative linguistics ; ; volume 68
Disciplina	302.2/244
Soggetti	Writing - Mathematical models Repetition (Rhetoric) Linguistics - Statistical methods Linguistics - Methodology Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front matter -- Foreword -- Contents -- 1. Introduction -- 2. Shapeless Repetition -- 3. Positional repetition -- 4. Associative repetition -- 5. Iterative repetition -- 6. Aggregative repetition -- 7. Repetition in blocks -- 8. Parallel repetitions -- 9. Cyclic repetition -- 10. Summary -- References -- Index
Sommario/riassunto	The present volume presents objective methods to detect and analyse various forms of repetitions. Repetition of textual elements is more than a superficial phenomenon. It may even be considered as constitutive for units and relations in a text: on a primary level when no other way exists to establish a unit – as in a musical composition (a motif can be recognised as such only after at least one repetition) – and on a secondary, artistic level, where repetition is a consequence of the transfer of the equivalence principle from the paradigmatic axis to the syntagmatic one as showed by R. Jakobson. The analysis of repetitive elements and structures in texts with objective mathematical means can serve several practical and theoretical purposes, among them: Characterisation of texts by means of parameters (measures, indicators) as taken from established mathematical statistics or

specifically constructed ones in individual cases. Comparison of texts on the basis of their quantitative characteristics and classification of the texts by the results. Research for the laws of text, which control the mechanisms connected to text creation. As a remote aim, the construction of a theory of text consisting of a system of text laws. The final attempt of every possible quantitative text analysis is the construction of a text theory. The book illustrates this on examples of such laws and corresponding empirical tests.

2. Record Nr.	UNINA9910790458203321
Autore	Onishi Akira <1929->
Titolo	Global model simulation [[electronic resource]] : a frontier of economic science // Akira Onishi
Pubbl/distr/stampa	New York, : Nova Science Publishers, c2010
ISBN	1-61324-955-1
Descrizione fisica	1 online resource (199 p.)
Collana	Economic issues, problems and perspectives series
Disciplina	330.01/12
Soggetti	Economic forecasting - Mathematical models Sustainable development - Mathematical models Globalization
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
