

1. Record Nr.	UNINA9910467428303321
Autore	Jacobs Lynn F. <1955->
Titolo	The secrets of college success / / Lynn F. Jacobs and Jeremy S. Hyman
Pubbl/distr/stampa	San Francisco, CA : , : Jossey Bass, a wiley Brand, , [2019] ©2019
ISBN	1-119-56186-8
Edizione	[Third edition.]
Descrizione fisica	1 online resource (329 pages)
Disciplina	378.1/980973
Soggetti	College student orientation - United States College students - United States - Conduct of life College students - Time management - United States Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	This is college -- In the beginning -- skills -- Specialties of the house -- It's showtime! -- Overcoming challenges -- Interfacing with the professor -- In case of emergency ... -- The second half -- Moving on -- The end-and the beginning.
Sommario/riassunto	"Picking a college is the something high school students and their parents spend a lot of time thinking about and researching. This helpful book will help them feel comfortable about the process. -Active authors. The authors maintain a web site, have an active speaking schedule, offer a popular campus orientation program, and write for national media on this topic. -Easy-to-Use Format: Lots of simple tips and humor that offers bite-size, high-value content that is presented in a style in which students are used to consuming content. Market description: High school students, college freshman, high school counselors, college recruiters, college orientation departments and first-year experience courses, parents and other relatives"--

Nota di contenuto	Front matter -- Introduction -- Contents -- List of contributing authors -- 1. Gastrotricha -- 2. Phylum Gnathostomulida -- 3. Micrognathozoa -- 4. Rotifera -- 5. Acanthocephala: functional morphology -- 6. Acanthocephala -- 7. Ecology of the Acanthocephala -- Index
Sommario/riassunto	This section of the Handbook of Zoology is intended as a comprehensive and exhaustive account of the biology of the taxa Gastrotricha, Nematoda, Nematomorpha, Priapulida, Kinorhyncha, Loricifera, Gnathostomulida, Micrognathozoa, Rotifera, Seisonida and Acanthocephala, covering all relevant topics such as morphology, ecology, phylogeny and diversity. The series is intended to be a detailed and up-to-date account of these taxa. As was the case with the first edition, the Handbook is intended to serve as a reliable resource for decades. Many of the taxa of this volume are comparatively unknown to many biologists, despite their diversity and importance for example in meiofaunal communities (Gastrotricha, Rotifera, Gnathostomulida), their fascinating recent discoveries (Loricifera and Micrognathozoa), their importance as parasites (many

nematodes, Nematomorpha, Acanthocephala) and their importance for evolutionary questions (e.g. Priapulida, Gastrotricha). The groups covered range from those poor in species (such as Micrognathozoa with 2 known species) to the species-rich and diverse Nematoda and their ca. 20.000 described species. While each taxon is covered by one chapter, nematodes are treated in several chapters dedicated to their structural, taxonomic and ecological diversity.
