Sommario/riassunto	This book demystifies the term "trafficking" with a view to properly understand its trends, dimensions, and gaps in policy and law that need to be plugged. Combating Human Trafficking aims to initiate fresh discussion on human trafficking, and offers recommendations to curb organized international crime. It explores varied dimensions of the crime and offers further classification to help effectively address the problem. It presents a new perspective of identifying assimilative interaction between social and criminal justice systems, the progressive growth in socio-criminal legislations, and the universal demand of multi-agency approach to combat trafficking. Through the Brute Mute theory, it gives an illustrative description of micro- and macro-governance, and offers a global perspective to the problem with

examples and case studies.

Sommario/riassunto	Why should Greek tragedy matter now? This book opens a dialogue between the tragic theatre in ancient Athens and the multiple performances of the modern world. In five interconnected essays, Rush Rehm engages tragedy on its own terms, using our oldest theatre as inspiration for how we might shape the theatre of the future. 'Theatre, Artifice, Environment' explores the difference between the outdoor theatre of Athens and the artificial interiors of modern performance. 'Theatre and Fear' compares the terrors confronted in Greek tragedy with our own, seemingly distant fears (environmental destruc

Sommario/riassunto	Mobile learning has become one of the more influential aspects of the field of educational technology, given the ubiquity of modern mobile devices and proliferation of educational applications or 'apps'. Within this volume, there are a range of studies and reviews which cover a breadth of current topics in the field, namely user motivations for using mobile learning, issues in evaluation, as well as domain-specific considerations (e.g., use within language learning or audio-based applications). Together, these studies represent the synthesis of a range of methods, approaches, and applications that highlight benefits and areas of future growth of mobile technologies and how they can be useful and most effective in education.
