| 1. Record Nr. | UNINA9910467561203321 |
| Autore | Wirth Harry |
| Titolo | Photovoltaic modules : technology and reliability / / Harry Wirth, Karl-Anders Weiss, Cornelia Wiesmeier |
| Pubbl/distr/stampa | Berlin, [Germany] ; ; Boston, [Massachusetts] : , : De Gruyter, , 2016 ©2016 |
| ISBN | 3-11-038398-5 3-11-034828-4 |
| Descrizione fisica | 1 online resource (xiv, 209 pages) : illustrations (some colour) |
| Disciplina | 621.381542 |
| Soggetti | Photovoltaic power systems - Equipment and supplies Photovoltaic cells Electronic books. |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Nota di bibliografia | Includes bibliographical references at the end of each chapters and index. |
| Nota di contenuto | Front matter -- Preface -- Contents -- Symbols and units -- Part I: Crystalline Silicon Module Technology 1 Introduction -- 1. Introduction -- 2. Solar cell properties -- 3. Module design, materials, and production -- 4. Basic module characterization -- 5. Module power and efficiency -- 6. Module performance -- 7. References -- Part II: Crystalline Silicon Module Reliability -- 8. Characterization of modules and degradation effects -- 9. Loads for PV Modules -- 10. Accelerated aging tests -- 11. Reliability testing of materials -- 12. Reliability testing of modules -- 13. PV module and component certification -- 14. References -- Index |
| Sommario/riassunto | Photovoltaic Modules: Technology and Reliability provides unique insights into concepts, material design strategies, manufacturing techniques, quality and service life analysis of wafer-based photovoltaic modules. Taking an interdisciplinary approach, the authors focus on two main topics. Part I - Crystalline Silicone Module Technology offers photovoltaics fundamentals: solar cell properties, module design, materials and production, basic module characterization, module power as well as efficiency and module |

performance. Part II, on the other hand, illustrates the state-of-the-art of module reliability by characterization of modules and degradation effects, examination of PV-Module loads, accelerated aging tests as well as reliability testing of materials and modules. A separate chapter is dedicated to PV module and component certification.
