ISBN	0-7556-0975-1 1-78673-444-3 1-78672-444-8
Edizione	[First edition.]
Descrizione fisica	1 online resource (xi, 260 pages) : illustrations, maps
Disciplina	320.54094965
Soggetti	Nationalism - Albania 20th century history: c 1900 to c 2000 Turkey Foreign relations Albania Albania Foreign relations Turkey
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	"The Crescent and the Eagle" examines the awakening of Albanian national identity from the end of the 19th century to the outbreak of the First World War - a period of intense nationalism in the Balkans - from an Ottoman perspective. Drawing on Ottoman and European archival material, the book undermines the customary negative stereotypes of Ottoman rule, offering a more nuanced interpretation. Gawrych provides a critical but objective examination of the evolution of government policies toward Albanians, from attempts to mould them into an "iron barrier" to the establishment of a uniform system of administration. He argues that this was a result of a complicated set of conflicting allegiances and identities, rather than a simply adversarial struggle between government imposition of policy and Albanian resistance. The author also analyses the general problems of endemic violence and misadministration at the provincial level, and examines Albanian efforts to gain nationality rights and maintain local privileges and tribal autonomy. Weaving his analysis of these events into a chronological framework, he concludes that Albanian independence

resulted from a confluence of foreign and domestic developments rather than from the design and will of the Albanians themselves. This stimulating study offers many fresh insights into the dynamics of power within the Ottoman Empire and contributes a new perspective to the study of the development of Albanian nationalism."--Bloomsbury Publishing.

Sommario/riassunto

This book provides an overview on physical realizations of quantum computing by means of molecular systems. It will be useful for graduate students and researchers interested in quantum computing from different areas of physics, physical chemistry, informatics and computer science. Each chapter is written in a self-contained manner and hence can be accessible for researchers and graduate students with even less background in the topics.
