Sommario/riassunto	Next to the Theogony and the Works and Days stands an entire corpus of fragmentary works attributed to the Boeotian poet Hesiod that has during the last thirty years attracted growing scholarly interest. Whereas other studies have concentrated either on the interpretation of the best preserved work of this corpus, the Catalogue of Women, or have offered detailed commentaries, this volume aims at bringing together studies focusing on generic and contextual factors pertaining

to the various works of the Hesiodic corpus, the Catalogue of Women included, and the corpus' afterlife in Rome and Byzantium.
