China's Economic Development and International Cooperation -- Chapter 8. Conclusions. .
Sommario/riassunto	This book analyses the important role of agribusiness and rural enterprises in economic growth and development. China's inclusive development of agribusiness and rural enterprises has played a pivotal role in economic growth, sustainable development and poverty reduction. This book analyses how market, price and institution are important factors for China's inclusive development of agribusiness and

rural enterprises. Incentive property rights of farming lands have impacted the allocation efficiency of resources in markets, which contributed to the growth of its agro-industrial development and the families-agribusiness. The technological changes contributed to the agricultural growth in China pre and post economic reform phases. The book introduces the combination development approach (CDA) of agribusiness and rural enterprises. The combination development approach of agribusiness and rural enterprises facilitates developing countries to upgrade into emerging economies and industrial economies. The book presents theoretical perspectives of development economics, and it introduces cutting-edge international development issues, and China's international economic cooperation on international trade and enterprises development. New technology and information technology bring new business opportunities to smallholder farmers in transitional economies and developing countries to access global value chain in the future.
