Conclusion: Social Work Education in Contemporary World: Issues, Challenges, and Concerns.

Sommario/riassunto

This handbook addresses the issues and challenges of the delivery of social work education in the contemporary world. It provides an authoritative overview of the key debates, switching the lens away from a Western-centric focus to engage with a much broader audience in countries that are in the process of modernization and professionalization, alongside those where social work education is more developed. Chapters tackle major challenges with respect to curriculum, teaching, practice, and training in light of globalization, providing a thorough examination of the practice of social work in diverse contexts. This handbook presents a contribution to the process of knowledge exchange which is essential to global social work education. It brings together professional knowledge and lived experience, both universal and local, and aims to be an essential reference for social work educators, researchers, and students.
