Nota di contenuto	Chapter 1. Introduction -- Chapter 2. Sustainability: concepts, definitions and applications -- Chapter 3. Energy sustainability -- Chapter 4. Cities -- Chapter 5. Sustainable cities -- Chapter 6. Informality and city, concomitants denied -- Chapter 7. Health literacy, pharmaceutical care and population health -- Chapter 8. Equity -- Chapter 9. Food insecurity -- Chapter 10. Violence against women and sustainable cities -- Chapter 11. Sustainable urban form and design -- Chapter 12. Sustainable transportation in cities -- Chapter 13. Sustainability of urban infrastructure -- Chapter 14. Sustainability urban energy -- Chapter 15. Urban waste management -- Chapter 16. Management of water -- Chapter 17. Climate change and cities -- Chapter 18. Consumer debt and social sustainability -- Chapter 19. Entrepreneurship for sustainable cities -- Chapter 20. Green consumerism -- Chapter 21. Sustainable Development Goals and cities -- Chapter 22. Closing remarks.

This book describes a broad view of sustainability as a crucial factor for the success of its implementation. Not only the environmental aspects of the sustainable cities' development are reviewed but the economic and social aspects of it, as highlighted in the UN Sustainable Development Goal 11 (make cities and human settlements inclusive, safe, resilient and sustainable). Nowadays, researchers, students, and stakeholders are highly involved in sustainability issues. Because of this, they need a guiding document to help them develop and implement sustainability programs at the level of companies and institutions. In this book, the authors discuss and explain basic concepts of sustainability-related to social, economic and environmental aspects, as well as strategies for its implementation.
