   Sommario/riassunto   Computational Intelligence and Intelligent Technologies are very
                         important tools in building intelligent systems with various degree of
                         autonomous behaviour These groups of tools support such features as
                         ability to learn and adaptability of the intelligent systems in various
                         types of environments and situations The current and future
                         Information Society is expecting to be implemented with the framework
                         of the Ambient Intelligence (AmI) approach into technologies and
                         everyday life.
