

1. Record Nr.	UNINA9910473452703321
Autore	Poland Therese M
Titolo	Invasive species in forests and rangelands of the United States : a comprehensive science synthesis for the United States forest sector / / edited by Therese M. Poland and others
Pubbl/distr/stampa	Springer Nature, 2021 Cham : , : Springer International Publishing : , : Imprint : Springer, , 2021
ISBN	3-030-45367-7
Descrizione fisica	1 online resource (XLII, 455 p. 87 illus., 67 illus. in color.)
Classificazione	SCI020000SCI026000
Altri autori (Persone)	PolandTherese M
Disciplina	ELECTRONIC BOOK
Soggetti	Conservation biology - United States Evolution (Biology) - United States Introduced organisms - United States
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This open access book describes the serious threat of invasive species to native ecosystems. Invasive species have caused and will continue to cause enormous ecological and economic damage with ever increasing world trade. This multi-disciplinary book, written by over 100 national experts, presents the latest research on a wide range of natural science and social science fields that explore the ecology, impacts, and practical tools for management of invasive species. It covers species of all taxonomic groups from insects and pathogens, to plants, vertebrates, and aquatic organisms that impact a diversity of habitats in forests, rangelands and grasslands of the United States. It is well-illustrated, provides summaries of the most important invasive species and issues impacting all regions of the country, and includes a comprehensive primary reference list for each topic. This scientific synthesis provides the cultural, economic, scientific and social context for addressing environmental challenges posed by invasive species and will be a valuable resource for scholars, policy makers, natural resource managers and practitioners.

Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	1. Environmental Restorative Justice: An introduction and an invitation -- 2. Restorative justice, repairing the harm and environmental outcomes -- 3. Restorative justice and environmental criminal law: A virtuous interplay -- 4. Restorative justice and Earth jurisprudence -- 5. Nature's rights and developing remedies: Enabling substantive and restorative relief in civil litigation -- 6. Earth trusteeship and the sovereign state -- 7. Turning up the restorative dial in environmental regulation with an Adaptive Learning Loop -- 8. Participatory

governance and restorative justice: What potential blending in environmental policymaking? - 9. Climate reparations, compensation, and intergenerational restorative justice -- 10. Meeting on thin ice: The potential for restorative climate justice in de-glaciating environments -- 11. Environmental restorative justice in transitional settings -- 12. The importance of environmental restorative justice for the United Nations Decade on Ecosystem Restoration (2021- 2030) -- 13. Restorative justice for illegal harms against animals: A potential answer full of interrogations -- 14. Towards environmental restorative justice in South Africa: How to understand and address wildlife offences -- 15. Exploring environmental restorative philosophy for victims: The pollution and life-world in Minamata, Japan -- 16. The art of repair: Restorative responses to environmental harm and ecocide -- 17. Harm to knowledge: Criminalising environmental movements speaking up against megaprojects -- 18. Looking for the restoration in restorative justice's response to civil disobedience -- 19. Environmental restorative justice in the Philippines: The innovations and unfinished business in waterways rehabilitation -- 20. Restoring justice and environmental knowledge in Sámi reindeer husbandry? - 21. Restor(y)ing the past to envision an 'other' future: A decolonial environmental restorative justice perspective -- 22. Socio-environmental harms in Chile under the restorative justice lens: The role of the state -- 23. Restorative justice conferencing in a New Zealand environmental offending context: Two models -- 24. Comparing institutional responses to the mining tailings dams collapses in Mariana and Brumadinho (Brazil) from an environmental restorative justice perspective -- 25. Restorative environmental justice with transnational corporations -- 26. Environmental restorative justice: Activating synergies.

Sommario/riassunto

This handbook explores the dynamic new field of Environmental Restorative Justice. Authors from diverse disciplines discuss how principles and practices of restorative justice can be used to address the threats and harms facing the environment today. The book covers a wide variety of subjects, from theoretical discussions about how to incorporate the voice of future generations, nature, and more-than-human animals and plants in processes of justice and repair, through to detailed descriptions of actual practices of Environmental Restorative Justice. The case studies explored in the volume are situated in a wide range of countries and in the context of varied forms of environmental harm – from small local pollution incidents, to endemic ongoing issues such as wildlife poaching, to cataclysmic environmental catastrophes resulting in cascades of harm to entire ecosystems. Throughout, it reveals how the relational and caring character of a restorative ethos can be conducive to finding solutions to problems through sharing stories, listening, healing, and holding people and organisations accountable for prevention and repairing of harm. It speaks to scholars in Criminology, Sociology, Law, and Environmental Justice and to practitioners, policy-makers, think-tanks and activists interested in the environment. Brunilda Pali is Senior Researcher at the Department of Social and Cultural Anthropology, KU Leuven, Belgium. She co-edited with Ivo Aertsen *Critical Restorative Justice* (2017) and *Restoring Justice and Security in Intercultural Europe* (2018). She has an interdisciplinary background and researches and publishes on gender and feminism, critical social theory, environmental and restorative justice, cultural and critical criminology, and arts. Miranda Forsyth is Professor at the School of Regulation and Global Governance, Australian National University. Her work sits at the intersection of justice, anthropology and criminology. She has published extensively on non-state justice

systems and restorative justice in Oceania and in Australia, including *A Bird that Flies with Two Wings* (2009) and *Weaving Intellectual Property* (2015). Felicity Tepper is Senior Research Officer at the School of Regulation and Global Governance, Australian National University. She has an extensive background in environmental law and policy in both the public and private sectors. Her research interests include environmental restorative justice, environmental governance, ecosystem restoration and post-disaster social-ecological recovery and resilience. .
