

1. Record Nr.	UNINA9910476771103321
Autore	Ustun Taha Selim
Titolo	Advanced Communication and Control Methods for Future Smartgrids / Taha Selim Ustun
Pubbl/distr/stampa	2019 [s.l.] : , : IntechOpen, , 2019
ISBN	9781789238181 1789238188
Descrizione fisica	1 online resource (1 p.)
Soggetti	Technology & Engineering / Electronics / Solid State Technology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Proliferation of distributed generation and the increased ability to monitor different parts of the electrical grid offer unprecedented opportunities for consumers and grid operators. Energy can be generated near the consumption points, which decreases transmission burdens and novel control schemes can be utilized to operate the grid closer to its limits. In other words, the same infrastructure can be used at higher capacities thanks to increased efficiency. Also, new players are integrated into this grid such as smart meters with local control capabilities, electric vehicles that can act as mobile storage devices, and smart inverters that can provide auxiliary support. To achieve stable and safe operation, it is necessary to observe and coordinate all of these components in the smartgrid.
