

1. Record Nr.	UNINA9910476792703321
Autore	Hicks Dan
Titolo	Lande : the Calais 'Jungle' and beyond // Dan Hicks, Sarah Mallet
Pubbl/distr/stampa	Bristol : , : Policy Press, , 2019
Edizione	[First edition.]
Descrizione fisica	1 online resource (x, 144 pages) : illustrations
Collana	Bristol shorts research
Disciplina	301.074
Soggetti	Anthropological museums and collections
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Preface -- Introduction: borderline archaeology -- Environmental hostility -- Temporal violence -- Visual politics -- Giving time.
Sommario/riassunto	Available Open Access under CC-BY-NC licence. How can Archaeology help us understand our contemporary world? This ground-breaking book reflects on material, visual and digital culture from the Calais "Jungle" - the informal camp where, before its destruction in October 2016, more than 10,000 displaced people lived. LANDE: The Calais 'Jungle' and Beyond reassesses how we understand 'crisis', activism, and the infrastructure of national borders in Refugee and Forced Migration Studies, foregrounding the politics of environments, time, and the ongoing legacies of empire. Introducing a major collaborative exhibit at Oxford's Pitt Rivers Museum, the book argues that an anthropological focus on duration, impermanence and traces of the most recent past can recentre the ongoing human experiences of displacement in Europe today.

2. Record Nr.	UNINA9910808020203321
Titolo	Suisun marsh : ecological history and possible futures // edited by Peter B. Moyle, Amber D. Manfree, Peggy L. Fiedler ; cover image by William Franklin Jackson
Pubbl/distr/stampa	Berkeley, California ; ; London, England : , : University of California Press, , 2014 ©2014
ISBN	0-520-95732-6
Descrizione fisica	1 online resource (269 p.)
Classificazione	NAT010000NAT011000
Disciplina	577.6809794/6
Soggetti	Marsh ecology - California - Suisun Marsh Salinity - California - Suisun Marsh Brackish water ecology - California - Suisun Marsh Water quality - California - Suisun Marsh Suisun Marsh (Calif.) History
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Front matter -- Contents -- Contributors -- Preface -- Acknowledgments -- 1. Introduction -- 2. Historical Ecology -- 3. Physical Processes and Geomorphic Features -- 4. Shifting Mosaics: Vegetation of Suisun Marsh -- 5. Waterfowl Ecology and Management -- 6. Terrestrial Vertebrates -- 7. Fishes and Aquatic Macroinvertebrates -- 8. Suisun Marsh Today: Agents of Change -- 9. Alternative Futures for Suisun Marsh -- Index
Sommario/riassunto	One of California's most remarkable wetlands, Suisun Marsh is the largest tidal marsh on the West Coast and a major feature of the San Francisco Estuary. This productive and unique habitat supports endemic species, is a nursery for native fishes, and is a vital link for migratory waterfowl. The 6,000-year-old marsh has been affected by human activity, and humans will continue to have significant impacts on the marsh as the sea level rises and cultural values shift in the century ahead. This study includes in-depth information about the

ecological and human history of Suisun Marsh, its abiotic and biotic characteristics, agents of ecological change, and alternative futures facing this ecosystem.
