Challenges to Ecosystem Service Valuation for Wealth Accounting (Kristine Grimsrud, Henrik Lindhjem, David N. Barton and Stale Navrud) -- 6. Is Economic Growth Linked with Comprehensive Wealth? Link to State-level Analysis in India (Haripriya Gundimeda) -- Part III: New Insights -- 7. Human Capital: Educational Attainment Progress (Babara Fraumani and Gang Liu) -- 8. Operationalising IWI for Policy-making Through a Learning Game (Bharath M. Palavalli, Srijan Sil and Anantha Kumar Duraiappah) -- 9. The IWR and Policy Lessons (Shunsuke Managi).
Sommario/riassunto	The Inclusive Wealth Index provides important insights into long-term economic growth and human well-being. The Index measures the wealth of nations through a comprehensive analysis of a country's productive base and the country's wealth in terms of progress, well-being and long-term sustainability. It measures all assets which human well-being is based upon, in particular, produced, human and natural capital to create and maintain human well-being over time.
