	Soggetti	Economics, Mathematical
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Nota di contenuto	Introduction. Sequences. Series and Finance Relations. Mappings and Functions. Differentiation. Integration. Vectors. Matrices and Determinants. Linear Equations and Inequalities. Linear Programming. Eigenvalue Problems and Quadratic Forms. Functions of Several Variables. Differential and Difference Equations.
	Sommario/riassunto	For all students who wish to understand current economic and business literature, knowledge of mathematical methods has become a prerequisite. Clear and concise, with precise definitions and theorems, Werner and Sotskov cover all the major topics required to gain a firm grounding in this subject including sequences, series, applications in finance, functions, differentiations, differentials and difference equations, optimizations with and without constraints, integrations and much more. Containing exercises and worked examples, precise definitions and theorems as well as economic applications, this book provides the reader with a comprehensive understanding of the mathematical models and tools used in both economics and business.
