Sommario/riassunto	"What have been the biggest successes in educational technology - and why have they succeeded when others have failed? Educational visions shows how innovations including citizen science, learning at scale, inclusive education, learning design and analytics have developed over decades. The book is shaped by the visions pursued by one research group for the past 40 years. It outlines the group's framework for innovation and shows how this can be put into practice to achieve long-term results that benefit both students and teachers at every educational level."-- Provided by publisher.
