

1. Record Nr.	UNINA9910476834303321
Titolo	Ovarian hyperstimulation syndrome // edited by Jan Gerris, Annick Delvigne and Francois Olivennes
Pubbl/distr/stampa	Boca Raton, FL : , : CRC Press, an imprint of Taylor and Francis, , 2006
ISBN	0-429-09540-6 0-203-01887-7
Edizione	[First edition.]
Descrizione fisica	1 online resource (xvi, 301 pages) : illustrations
Collana	Reproductive medicine & assisted reproductive techniques series
Disciplina	618.11
Soggetti	Ovaries - Diseases
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction - General Relevance of OHSS to the Safety and Quality of ART Section I: General and Clinical Aspects 1. General Definitions of OHSS 2. Epidemiology and Primary Risk-Factors of OHSS 3. Secondary Risk-Factors of OHSS during Stimulation 4. Clinical Manifestations of OHSS 5. Thrombo-Embolic Complications of OHSS 6. Anonymous Reports of Lethal Cases of OHSS 7. Modern Classification of OHSS 8. OHSS in Singleton and Twin Pregnancies Section II: Pathophysiology of OHSS 9. Physiopatology of OHSS 10. Role of the Vascular Endothelial Growth Factor (VEGF) in the Pathophysiology of OHSS 11. The Rennin-Angiotensin System in the Pathophysiology of OHSS 12. Immunological Aspects of OHSS 13. Genetic Aspects of OHSS 14. Potential New Treatment Implications Derived from Recent Molecular Developments in OHSS Section III: Management and Treatment 15. Treatment and Management of the Patients Presenting with OHSS 16. Management of OHSS from an American Perspective 17. Life-Threatening Forms of OHSS and the Intensive Care of the OHSS Patient 18. Outpatient Management of Patients with OHSS Section IV: Prevention 19. Primary Prevention: Choice Induction and of Ovarian Stimulation in IVF and Non-IVF Technologies 20. Does Ovulation Triggering Influence the Risk of OHSS? 21. Secondary Prevention of Threatening OHSS 22. The Role of Coasting in the Prevention of Threatening OHSS: An European Perspective 23. The Role of Coasting in the Prevention of Threatening OHSS: An American Perspective 24. Health Economic Reflections on

OHSS and the Importance of Registries 25. Intravenous Hydroxyethyl Starch Infusion and Albumin Administration: Effective Tools as Adjuvants in the Prevention of OHSS 26. Ovarian Hyperstimulation Syndrome (OHSS) Summary and Guidelines.

Sommario/riassunto

Major advances have recently been made in our understanding of Ovarian Hyperstimulation Syndrome (OHSS) These include improving classification, recognizing primary and secondary risk factors, manipulating and monitoring ovarian stimulation, handling risky situations, and elucidating the underlying pathophysiologic mechanisms of the syndrome. As such, all health care professionals working in reproductive medicine should be acquainted with the theoretical and practical aspects of how to deal with this syndrome, both from a prophylactic point of view and once it has developed.
