Sommario/riassunto	"For 60 years, scientists from the United States and the Soviet Union participated in state-organized programs of collaboration. From the

first scientific exchanges of the Cold War years through the fall of the Soviet Union, Gerson S. Sher, a former manager of these cooperative programs, provides a detailed and critical assessment of what worked, what didn't, and why it matters"--

Sommario/riassunto

This ground-breaking book is an impressively extensive collection of primary historical sources in various languages that reflect the history of the Roma (formerly referred to as 'Gypsies' in local languages). The selection of the included materials reflects the authentic voice of the Roma themselves, and presents their visions and the specific goals pursued by the Roma civic emancipation movement. The source materials are published in original and translated in English, and are accompanied by explanatory notes and summarising comments discussing the specific historical realities and their interrelation to the Romani emancipatory movement in Central and Eastern Europe, thus presenting a comprehensive picture of the historical processes.
