Livello bibliografico	Monografia
Nota di contenuto	1. Understanding and acting upon a creeping crisis -- 2. Antimicrobial resistance as a creeping crisis -- 3. WannaCry as a creeping crisis -- 4. Remaining foreign fighters: fear, misconceptions and counterproductive responses -- 5. Big Data as a creeping crisis -- 6. Migration, borders and society -- 7. From creeping to full-blown crisis: lessons from the Dutch and Swedish responses to Covid-19 -- 8. Political attention in a creeping crisis: the case of climate change and migration -- 9. Earthquakes in Groningen: organized suppression of a creeping crisis -- 10. Understanding creeping crises: revisiting the puzzle.
Sommario/riassunto	This open access book explores a special species of trouble afflicting modern societies: creeping crises. These crises evolve over time, reveal themselves in different ways, and resist comprehensive responses despite periodic public attention. As a result, these crises continue to

creep in front of our eyes. This book begins by defining the concept of a creeping crisis, showing how existing literature fails to properly define and explore this phenomenon and outlining the challenges such crises pose to practitioners. Drawing on ongoing research, this book presents a diverse set of case studies on: antimicrobial resistance, climate change-induced migration, energy extraction, big data, Covid-19, migration, foreign fighters, and cyberattacks. Each chapter explores how creeping crises come into existence, why they can develop unimpeded, and the consequences they bring in terms of damage and legitimacy loss. The book provides a proof-of-concept to help launch the systematic study of creeping crises. Our analysis helps academics understand a new species of threat and practitioners recognize and prepare for creeping crises. Arjen Boin is Professor of Public Institutions and Governance at the Department of Political Science, Leiden University, the Netherlands. Magnus Ekengren is Professor of Political Science at the Swedish Defence University, Sweden, and a former Swedish diplomat. Mark Rhinard is Professor of International Relations at Stockholm University and Senior Research Fellow at the Swedish Institute of International Affairs, Sweden. .
