Collana	Savoir Faire
Altri autori (Persone)	BonneauXavier FloriAlbert
Soggetti	Technology, engineering, agriculture
Lingua di pubblicazione	Francese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This guide designs fertilization schemes for oil palm plantations. It explains in clear language how to develop a fertilization scheme tailored to individual plantations taking the specific characteristics of each site into account. It contains numerous examples from trials conducted in different types of soils, climates and plant material in Africa and Latin America.
