Institutional structures and employment conditions of

South Korean female part-time jobs; 13. Conclusion and prospects;
Index; Back cover.

Sommario/riassunto

This book brings together leading international authors from a number of fields to provide an up to date understanding of part-time work at national, sector, industry and workplace levels. The contributors critically examine part-time employment in different institutional settings across Europe, the USA, Australia and Korea. This analysis serves as a prism to investigate wider trends, particularly in female employment, including the continued increase in part-time work and processes that are increasingly creating dualization and inequality between 'good' and 'bad' jobs.
