## Sommario/riassunto

Between 1989 and 1991, excavations in the parish of Flixborough, North Lincolnshire, unearthed remains of an Anglo-Saxon settlement associated with one of the largest collections of artefacts and animal bones yet found on such a site. In an unprecedented occupation sequence from an Anglo-Saxon rural settlement, six main periods of occupation have been identified, dating from the seventh to the early eleventh centuries; with a further period of activity, between the twelfth and fifteenth centuries AD. The remains of approximately forty buildings and other structures were uncovered; and due to t
