

1. Record Nr.	UNINA9910477302103321
Titolo	International Rainwater Catchment Systems Experiences : : Towards sustainability / / Jose Arturo Gleason Espindola, Cesar Augusto Casiano Flores
Pubbl/distr/stampa	IWA Publishing, 2020 [s.l.] : , : IWA Publishing, , 2020
ISBN	1-78906-058-3
Edizione	[1st ed.]
Descrizione fisica	1 online resource (1 p.)
Soggetti	Technology & Engineering / Mining Science / Applied Sciences Science / Environmental Science Science
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Cover -- Contents -- About the Authors -- Preface -- Introduction -- Section 1: Basic Concepts -- I. The importance of rainwater catchment systems -- I.1 History of rainwater catchment systems -- I.2 Rainwater harvesting in Mesoamerica -- I.3 Recent efforts of rainwater harvesting around the world -- II. FUNDAMENTALS OF RAINWATER CATCHMENT SYSTEM -- REFERENCES -- Section 2: Narratives of RWH -- Chapter 1: Rain: Water for health, livelihood and self-reliance -- 1.1 INTRODUCTION -- 1.2 HARVESTING RAIN, GOING GLOBAL -- 1.3 RAINWATER HARVESTING FOR DOMESTIC WATER SUPPLY -- 1.3.1 Why collect rainwater for drinking and domestic needs? -- 1.3.1.1 In semi-arid areas or at an uphill elevation -- 1.3.1.2 When ground water has a bad taste -- 1.3.1.3 Substitution -- 1.3.1.4 Rainwater may bring a better service -- 1.3.2 Managing the stored water -- 1.3.3 Quality of harvested and stored rain water -- 1.3.4 Initiating rainwater harvesting programmes -- 1.4 USE OF RAINWATER FOR DOMESTIC USE -- 1.5 SUSTAINABLE DEVELOPMENT GOAL (SDG) 6 -- 1.6 HOW TO PROVIDE WATER SUPPLY SERVICES TO THE LAST 10% OF THE UNSERVED? -- 1.7 BE READY TO COLLECT AND STORE RAIN -- 1.8

CONCLUSION -- REFERENCES -- Chapter 2: Harvesting the potential --
2.1 INTRODUCTION -- 2.2 HARVESTING RAINWATER FOR
ENVIRONMENTAL STEWARDSHIP -- 2.3 HARVESTING RAINWATER FOR
STORMWATER REDUCTION -- 2.4 HARVESTING THE OPPORTUNITY TO
INFLUENCE DECISION MAKERS -- 2.5 HARVESTING RAINWATER FOR LIFE
-- 2.6 HARVEST THE POTENTIAL TO PROVIDE EDUCATION -- 2.6.1 The
American Rainwater Catchment Systems Association (ARCSA) -- 2.7
CONCLUSION -- REFERENCES -- Chapter 3: Transforming tradition of
rainwater harvesting in Sri Lanka -- 3.1 INTRODUCTION -- 3.2
INSTITUTIONAL UPTAKE OF RWH -- 3.3 LANKA RAINWATER
HARVESTING FORUM -- 3.4 RAINWATER POLICY AND REGULATIONS IN
SRI LANKA.
3.5 PROVIDING WATER AND FOOD SECURITY FOR COMMUNITIES AT
TIMES OF DISASTER -- 3.6 CLIMATE RISK RESILIENCE -- 3.7 IMPROVING
HEALTH -- 3.8 RUNOFF COLLECTION FOR CROP GROWTH -- 3.9
CONCLUSION -- REFERENCES -- Chapter 4: Rainwater catchment on
Hawai'i Island -- 4.1 INTRODUCTION -- 4.1.1 Introduction to Hawai'i
-- 4.1.2 Catchment history -- 4.2 UNIQUENESS OF THE BIG ISLAND
CATCHMENT -- 4.3 REGULATIONS -- 4.4 WATER QUALITY -- 4.5
RAINWATER CATCHMENT PROGRAM BEGINNING -- 4.6 THE RAINWATER
CATCHMENT PROGRAM -- 4.7 RAINWATER CATCHMENT PROGRAM
EXPANSION -- 4.7.1 Education -- 4.7.2 Available agent -- 4.8
COLLABORATIONS -- 4.8.1 Vendor support -- 4.8.2 Expanding
research and collaborations -- 4.9 ENVIRONMENTAL CHANGE EFFECTS
ON RAINWATER CATCHMENT -- 4.9.1 Weather/rainfall -- 4.9.2
Environmental change: Invasive species -- 4.9.3 Environmental change:
Volcanic -- 4.9.4 Environmental study -- 4.10 SUMMARY --
REFERENCES -- Chapter 5: Mexican rainwater harvesting movement in
recent years -- 5.1 RAINWATER HISTORY IN MEXICO -- 5.2 RAINWATER
IN 21ST CENTURY MEXICO -- 5.3 RAINWATER AS AN INDUSTRIAL
APPROACH -- 5.4 INSTITUTIONAL EFFORTS -- 5.4.1 Expansion of good
rainwater practices -- 5.4.2 Certification program to accredit
professionals in rainwater harvesting -- 5.5 CONCLUSION --
REFERENCES -- Chapter 6: Harvesting rainwater: An adaptation strategy
for peace and the climate crisis -- 6.1 INTRODUCTION -- 6.2
CONFRONTING GLOBAL CLIMATE CRISIS -- 6.3 RAIN IN THE ANDEAN
AMAZONIAWATER CYCLE -- 6.3.1 Scaling rainwater harvesting -- 6.4
KNOWLEDGE EXCHANGES -- 6.5 INTEGRATED RAINWATER
MANAGEMENT APPROACH -- ACKNOWLEDGEMENT -- REFERENCES --
Section 3: Programs -- Chapter 7: Social enterprise on sky water
harvesting for solving drinking water crisis in coastal areas in
Bangladesh -- 7.1 DRINKING WATER CRISIS IN COASTAL AREAS OF
BANGLADESH -- 7.2 BASE LINE SURVEY.
7.3 DEVELOPMENT OF LOW-COST RAINWATER TANK -- 7.4 AMAMIZU
SOCIAL PROJECT -- REFERENCES -- Chapter 8: Catalyzing the
widespread adoption of rainwater harvesting in Mexico City -- 8.1
INTRODUCTION -- 8.2 SOCIAL AND ECOLOGICAL CHALLENGE -- 8.3
ISLA URBANA MODEL -- 8.4 OTHER TESTED SOLUTIONS -- 8.5 SOCIAL
ENTREPRENUERSHIP SOLUTION MARKETING APPROACH -- 8.6 GOALS
AND EXPECTED IMPACT -- 8.7 IMPLEMENTATION PLAN -- 8.8
CONCLUSION -- REFERENCES -- Chapter 9: Promotion of rainwater
harvesting as a business -- 9.1 INTRODUCTION -- 9.2 RAINWATER
HARVESTING AS A BUSINESS -- 9.2.1 A Case of the Rainwater4Sale
project in Lwengo District, Uganda -- 9.2.2 Lessons learned -- 9.2.3
Challenges and how they were addressed -- 9.3 CONCLUSION -- WHO
WE ARE -- OUR MANDATE -- Chapter 10: Experience in sustainable
management of rainwater for multiple purposes: Case in ten villages,
gossas district, Senegal -- 10.1 CONTEXT -- 10.2 HYDRO-GEOGRAPHY

AND HYDRO-CHEMISTRY IN GOSSAS -- 10.3 METHODOLOGY -- 10.4 RESULTS -- 10.5 DISCUSSION -- 10.6 DIFFICULTIES AND LIMITS OF THE PROJECT -- 10.7 LESSONS LEARNED -- 10.8 CONCLUSIONS -- 10.9 BENEFICIARIES' TESTIMONIALS -- ACKNOWLEDGEMENTS -- REFERENCES -- Chapter 11: Rainwater harvesting for improved food security and environmental conservation -- Experiences from Malawi -- 11.1 INTRODUCTION -- 11.2 CONTEXT -- 11.2.1 Geographical location -- 11.2.2 The Rainwater Harvesting Association of Malawi -- 11.2.3 Policy direction on rainwater harvesting in Malawi -- 11.3 RAINWATER HARVESTING PRACTICES IN MALAWI -- 11.3.1 Above ground tanks -- 11.3.2 Lined underground tanks -- 11.3.3 Dams -- 11.3.4 In-situ or soil storage rainwater harvesting -- 11.3.5 Flood-based farming systems -- 11.4 BENEFITS AND IMPACTS OF RAINWATER HARVESTING -- 11.4.1 Lessons learned -- 11.5 WAY FORWARD -- REFERENCES. Chapter 12: Challenges and opportunities in the implementation of rainwater barrels. An analysis of usability for the Guadalajara Metropolitan Area, México -- 12.1 INTRODUCTION -- 12.2 INDUSTRIAL DESIGN AS AN INTERVENTION TOOL -- 12.3 USABILITY AS AN EVALUATION TOOL OF DESIGNED OBJECTS -- 12.4 USABILITY MEASUREMENT PARAMETERS -- 12.5 STAGES OF THE SYSTEMIC MODEL -- 12.6 RAIN BARRELS AND THE SCALL -- 12.7 CHARACTERISTICS OF THE RAINWATER COLLECTION BARRELS -- 12.8 CHALLENGES AND OPPORTUNITIES IN THE IMPLEMENTATION OF RAINWATER BARRELS -- 12.9 RECOMMENDATIONS -- REFERENCES -- Section 4: Notable Technical Cases -- Chapter 13: The success story of multi-purpose rainwater management system at Star City, Korea: Design, climate change adaptation potential and philosophy -- 13.1 INTRODUCTION -- 13.2 DESIGN AND OPERATION OF STAR CITY RWHM -- 13.2.1 Design -- 13.2.2 Operation data (Han & Nguyen, 2018) -- 13.2.2.1 Water quality -- 13.2.2.2 Water quantity -- 13.3 CLIMATE CHANGE ADAPTATION POTENTIAL -- 13.4 PHILOSOPHICAL CONSIDERATION OF STAR CITY -- 13.4.1 Win-Win process -- 13.4.2 Philosophy of 'Dong' (Village) -- 13.4.3 Five Commandments for water management -- 13.5 CONCLUSION -- REFERENCES -- Chapter 14: Developing a national rainwater harvesting standard -- 14.1 INTRODUCTION -- 14.2 DISCUSSION -- 14.3 TECHNICAL -- 14.3.1 The collection surface (roof) -- 14.3.2 Water storage and distribution -- 14.3.3 Water sanitation - maintaining water quality -- 14.3.4 Maintenance and testing -- 14.4 POLITICS AND PUBLIC AWARENESS -- 14.5 SUMMARY -- REFERENCES -- Chapter 15: Stormwater management in transition in Brussels-Capital Region -- 15.1 INTRODUCTION -- 15.2 STORMWATER AS A SOURCE OF DAMAGE FOR THE URBAN ENVIRONMENT -- 15.3 STORMWATER BOTH AS A RESOURCE AND AS A SOURCE OF DAMAGE IN WATER AND URBAN POLICIES -- 15.4 PRESENT WATER-RELATED HAZARDS. 15.4.1 Sewer system overflows as the main source of surface water pollution -- 15.4.2 Pluvial urban flooding -- 15.4.3 Conventional actions to mitigate urban flooding -- 15.5 FRAGMENTATION OF RESPONSIBILITIES BETWEEN REGIONAL, INTER-MUNICIPAL AND MUNICIPAL ADMINISTRATIVE LEVELS -- 15.6 DYNAMISM OF THE CIVIL SOCIETY AS A LINK BETWEEN URBAN PLANNING AND STORMWATER MANAGEMENT -- 15.7 LOOKING TOWARDS THE FUTURE -- REFERENCES -- Chapter 16: Smart rainwater management and its impacts on drought resilience by Rural Semi-Arid communities: a case study of Northeast Brazil -- 16.1 INTRODUCTION -- 16.2 AREA OF REFERENCE -- 16.3 THE ANSWER IS TO LIVE WITH THE SEMI-ARID CLIMATE -- 16.4 FIVE STEPS OF (RAIN) WATER MANAGEMENT -- 16.4.1 Water for families -- 16.4.2 Water for the Community -- 16.4.3 Water for agriculture -- 16.4.4 Water for emergency situations -- 16.4.5

Managing water for the environment -- 16.5 EVALUATION AND OUTLOOK -- REFERENCES -- Chapter 17: Every drip counts: Confusion of cause with effect in the climate debate -- 17.1 BACKGROUND -- 17.2 POTSDAMER PLATZ -- 17.3 ADLERSHOF PHYSICS BUILDING -- REFERENCES -- Chapter 18: The Calabash Cistern 5000 L in Africa -- 18.1 INTRODUCTION -- 18.2 THE DESIGN OF THE CALABASH CISTERN -- 18.2.1 Development -- 18.2.2 The 5000 L Calabash Cistern -- 18.2.3 Shape -- 18.2.4 Advantages -- 18.3 THE CALABASH PROJECT IN GUINEA-BISSAU -- 18.3.1 How it started -- 18.3.2 The 1st pillar of the project: The African village -- 18.3.3 The 2nd pillar (and driver): A private water cistern -- 18.3.4 The 3rd pillar: The initiative -- 18.3.5 The start of the Calabash project was booming -- 18.3.6 The Calabash Project sails to the islands of Guinea-Bissau -- 18.3.7 Clean water changes opinion about cholera -- 18.3.8 Transport and salty sand -- 18.3.9 Another change -- 18.4 THE FIRST SUCCESSFUL INTERNATIONAL TRAINING IN DR CONGO. 18.4.1 The importance of the manager.

Sommario/riassunto

Harvesting rain and using it for drinking and domestic use will help to give scattered rural households and under-served city dwellers access to water. The world cannot ignore using rain - as the source of all water. This book presents stories and experiences from some 15 countries from all over the globe, developed and less developed. There are many more experiences that can be highlighted, but those included are thought to give the reader a good overview of what can be done when water supply engineering investment has not yet reached the unserved. Rainwater harvesting has an important role to play as a safe water supply when other sources are not safe or not available. A rainwater system brings along storage. It may be perceived as a little expensive but will normally be cheaper than a house connection from a centrally treated water supply system. Moreover, the storage will be invaluable in an emergency when tankered water can be stored. Also, in times of drought households with rainwater storage will still have a supply of water.
