

1. Record Nr.	UNINA9910479861803321
Autore	Greenberg Ralph <1944->
Titolo	Iwasawa Theory, Projective Modules, and Modular Representations / / Ralph Greenberg
Pubbl/distr/stampa	Providence, Rhode Island : , : American Mathematical Society, , 2010 ©2010
ISBN	1-4704-0609-8
Descrizione fisica	1 online resource (185 p.)
Collana	Memoirs of the American Mathematical Society, , 0065-9266 ; ; Number 922
Disciplina	512.7/4
Soggetti	Iwasawa theory Curves, Elliptic Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"May 2011, volume 211, number 992 (second of 5 numbers)." -- T.p.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	""Contents""; ""Abstract""; ""Chapter 1. Introduction.""; ""1.1. Congruence relations.""; ""1.2. Selmer groups for elliptic curves.""; ""1.3. Behavior of Iwasawa invariants.""; ""1.4. Selmer atoms.""; ""1.5. Parity questions.""; ""1.6. Other situations.""; ""1.7. Organization and acknowledgements.""; ""Chapter 2. Projective and quasi-projective modules.""; ""2.1. Criteria for projectivity and quasi-projectivity.""; ""2.2. Nonzero -invariant.""; ""2.3. The structure of $G/\text{to.}G$.""; ""2.4. Projective dimension.""; ""Chapter 3. Projectivity or quasi-projectivity of $X_E(K)$."" ""3.1. The proof of Theorem 1.""""3.2. Quasi-projectivity.""; ""3.3. Partial converses.""; ""3.4. More general situations.""; ""3.5. - extensions.""; ""Chapter 4. Selmer atoms.""; ""4.1. Various cohomology groups. Coranks. Criteria for vanishing.""; ""4.2. Selmer groups for $E[p]$.""; ""4.3. Justification of (1.4.b) and (1.4.c).""; ""4.4. Justification of (1.4.d) and the proof of Theorem 2.""; ""4.5. Finiteness of Selmer atoms.""; ""Chapter 5. The structure of $H_v(K, E)$.""; ""5.1. Determination of $E_v()$.""; ""5.2. Determination of ""426830A E_v, ""526930B ."" ""5.3. Projectivity and Herbrand quotients.""""Chapter 6. The case where is a p-group.""; ""Chapter 7. Other specific groups.""; ""7.1. The groups A_4, S_4, and S_5.""; ""7.2. The group $\text{PGL}_2(\mathbb{F}_p)$.""; ""7.3. The groups PGL_2

$(\mathbb{Z}/p^r+1\mathbb{Z})$ for $r \geq 1$.
 7.4. Extensions of $(\mathbb{Z}/p\mathbb{Z})$ by a p -group.
 Chapter 8. Some arithmetic illustrations.
 8.1. An illustration where 0 is empty.
 8.2. An illustration where 0 is non-empty.
 8.3. An illustration where the 0365 's have abelian image.
 8.4. False Tate extensions of $\mathbb{Q}$.
 Chapter 9. Self-dual representations.
 9.1. Various classes of groups.
 9.2. groups.
 9.3. Some parity results concerning multiplicities.
 9.4. Self-dual representations and the decomposition map.
 Chapter 10. A duality theorem.
 10.1. The main result.
 10.2. Consequences concerning the parity of $s_E()$.
 Chapter 11. p -modular functions.
 11.1. Basic examples of p -modular functions.
 11.2. Some p -modular functions involving multiplicities.
 Chapter 12. Parity.
 12.1. The proof of Theorem 3.
 12.2. Consequences concerning $W\text{Del}(E,)$ and $W\text{Sel}(E,)$.
 Chapter 13. More arithmetic illustrations.
 13.1. An illustration where $E/K/F$ is empty.
 13.2. An illustration where $K/\mathbb{Q}(E[p])$.
 13.3. An illustration where $\text{Gal}(K/\mathbb{Q})$ is isomorphic to B_n or H_n .
