

1. Record Nr.	UNINA9910480228503321
Autore	McCord Christopher Keil
Titolo	The integral manifolds of the three body problem // Christopher K. McCord, Kenneth R. Meyer, Quidong Wang
Pubbl/distr/stampa	Providence, Rhode Island : , : American Mathematical Society, , 1998
ISBN	1-4704-0217-3
Descrizione fisica	1 online resource (106 p.)
Collana	Memoirs of the American Mathematical Society, , 0065-9266 ; ; number 628
Disciplina	521
Soggetti	Three-body problem Celestial mechanics Manifolds (Mathematics) Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"March 1998, volume 132, number 628 (fourth of 5 numbers)."
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	<p>""Contents""; ""Chapter 1. Introduction""; ""1. The integrals and manifolds""; ""2. History of the problem""; ""3. Summary of results "";</p> <p>""Chapter 2. The Decomposition of the Spaces""; ""1. The spaces and maps""; ""2. The geometry of the sets""; ""Chapter 3. The Cohomology""; ""1. The cohomology of $k[\text{sub}(R)](c,h)$""; ""2. The cohomology of $k(c,h)$""; ""3. The homeomorphism type of $h(c,h)$ and $h[\text{sub}(R)](c,h)$""; ""4. The cohomology of $m[\text{sub}(R)](c,h)$""; ""5. The cohomology of $m(c,h)$""; ""Chapter 4. The analysis of $k(c,h)$ for equal masses""</p> <p>""1. $y[\text{sub}(1)][\text{sup}(2)] + y[\text{sub}(2)][\text{sup}(2)]$ as function of $I?,I?$ for equal masses""""2. The semi-minor axis of the ellipse for equal masses""; ""3. The graphs of $Z = f(X)$ and $Z = g(X)$ for equal masses""; ""4. The semi-major axis of the ellipse for equal masses""; ""5. The feasible region $c(c, h)$""; ""6. $k[\text{sub}(R)](c,h)$ for equal masses""; ""7. Orientation in $k(c,h)$""; ""8. Positive energy""; ""Chapter 5. The analysis of $k(c,h)$ for general masses""; ""1. $y[\text{sub}(1)][\text{sup}(2)] + y[\text{sub}(2)][\text{sup}(2)]$ as function of $I?,I?$ for general masses""; ""2. The semi-minor axis of the ellipse""</p> <p>""3. The graph of $Z = f(X)$ and $Z = g(X)$ for general masses""""4. The semi-major axis of the ellipse for unequal masses""; ""5. $k[\text{sub}(R)](c,h)$ for unequal masses""; ""Bibliography""</p>
