Disciplina	940.394
Soggetti	World War, 1914-1918 - Casualties - Australia World War, 1914-1918 - Casualties - Research World War, 1914-1918 - Casualties Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	"The official Australian casualty statistics suffered by the men of the Australian Imperial Force in the First World War are seriously wrong, with significant inaccuracies and omissions. Groundbreaking research exhaustively examining over 12,000 individual soldiers' records has revealed that hospitalisations for wounding, illness and injury suffered by men of the AIF are five times greater than officially acknowledged today. Why has it taken nearly one hundred years for this to come to light? Was it a conspiracy to suppress the toll, incompetence of Australia's official war historians Bean and Butler, or was it simply the unquestioning acceptance of the official record? You are invited on the journey in this book to find the truth. The findings are startling and will rewrite Australia's casualty statistics of the First World War. Lest we forget."--Page 4 of cover.

2. Record Nr.	UNINA9910453882803321
Autore	Coon David W

Sommario/riassunto	Increasing evidence has demonstrated that caregivers of dementia victims are at risk for depression and other medical problems. In what ways can health care providers improve or maintain the well-being of dementia caregivers?. This volume provides an overview of emerging themes in dementia caregiving research and presents a broad array of practical strategies for reducing caregiver distress, including interventions for specific populations such as ethnic minority caregivers, male caregivers, and caregivers with diverse sexual orientations. Innovative approaches include the value of partnering
