## Sommario/riassunto

If businesses and other organizations are to meet the many and complex challenges of sustainable development, then they all, both public and private, need to embed sustainability considerations into their decision-making and reporting. However, the translation of this aspiration into effective action is often inhibited by the lack of systems and procedures that take sustainability into account.

- measure and link sustainability and financial performance;
- integrate sustainability into 'mainstream' reporting, both to management and external stakeholders.
