Autore	Newman Nathan <1966->
Titolo	Net loss : Internet prophets, private profits, and the costs to community // Nathan Newman
Pubbl/distr/stampa	University Park, Pennsylvania : , : The Pennsylvania State University Press, , [2002] ©2002
ISBN	0-271-03129-8
Descrizione fisica	1 online resource (xxi, 399 pages)
Disciplina	338.470046780973
Soggetti	Internet industry - Government policy - United States Internet - Government policy - United States Industrial promotion - United States - Regional disparities Computer industry - California - Santa Clara Valley (Santa Clara County) Computer industry - Developing countries International division of labor Globalization - Economic aspects - United States Electronic books. United States Economic conditions 1981-2001 Regional disparities
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references (pages 353-379) and index.
Nota di contenuto	Front matter -- Contents -- Analytical Table of Contents -- Preface -- Acronyms -- 1 Introduction -- 2 How the Federal Government Created the Internet, and How the Internet Is Threatened by the Government's Withdrawal -- 3 Federal Spending and the Regionalization of Technology Development -- 4 Business Cooperation and the Business Politics of Regions in the Information Age -- 5 Banks, Electricity, and Phones: Technology, Regional Decline, and the Marketization of Fixed Capital -- 6 Local Government Up for Bid: Internet Taxes, Economic Development, and Public Information -- 7 Conclusion: The Death of Community Economics, or Think Locally, Act Globally -- Notes -- Bibliography -- Index
Sommario/riassunto	How has the Internet been changing our lives, and how did these

changes come about? Nathan Newman seeks the answers to these questions by studying the emergence of the Internet economy in Silicon Valley and the transformation of power relations it has brought about in our new information age. *Net Loss* is his effort to understand why technological innovation and growth have been accompanied by increasing economic inequality and a sense of political powerlessness among large sectors of the population. Newman first tells the story of the federal government's crucial role in the early development of the Internet, with the promotion of open computer standards and collaborative business practices that became the driving force of the Silicon Valley model. He then examines the complex dynamic of the process whereby regional economies have been changing as business alliances built around industries like the Internet replace the broader public investments that fueled regional growth in the past. A radical restructuring of once regionally focused industries like banking, electric utilities, and telephone companies is under way, with changes in federal regulation helping to undermine regional planning and the power of local community actors. The rise of global Internet commerce itself contributes to weakening the tax base of local governments, even as these governments increasingly use networked technology to market themselves and their citizens to global business, usually at the expense of all but their most elite residents. More optimistically, Newman sees an emerging countertrend of global use of the Internet by grassroots organizations, such as those in the antiglobalization movements, that may help to transcend this local powerlessness.
