1. Record Nr.   UNINA9910480512203321

   Autore   Brundan Jonathan <1970->

   Titolo   Quantum linear groups and representations of GLn (Fq) / / Jonathan
                      Brundan, Richard Dipper, Alexander Kleshchev

   Pubbl/distr/stampa Providence, Rhode Island : , : American Mathematical Society, , 2001

   ISBN   1-4704-0297-1

   Descrizione fisica 1 online resource (127 p.)

   Collana   Memoirs of the American Mathematical Society, , 0065-9266 ; ; number
                      706

   Disciplina   510 s
                      512/.2

   Soggetti   Linear algebraic groups
                      Representations of groups
                      Group schemes (Mathematics)
                      Electronic books.

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   "January 2001, volume 149, Number 706 (first of 4 numbers)."

   Nota di bibliografia   Includes bibliographical references.

   Nota di contenuto ""Contents""; ""Introduction""; ""1 Quantum linear groups and
                      polynomial induction""; ""1.1 Symmetric groups and Hecke algebras"";
                      ""1.2 The g-Schur algebra""; ""1.3 Tensor products and Levi
                      subalgebras""; ""1.4 Polynomial induction""; ""1.5 Schur algebra
                      induction""; ""2 Classical results on GL[sub(n)]""; ""2.1 Conjugacy
                      classes and Levi subgroups""; ""2.2 Harish-Chandra induction and
                      restriction""; ""2.3 Characters and Deligne-Lusztig operators""; ""2.4
                      Cuspidal representations and blocks""; ""2.5 Howlett-Lehrer theory and
                      the Gelfand-Graev representation""
                      ""3 Connecting GL[sub(n)] with quantum linear groups""""3.1 Schur
                      functors""; ""3.2 The cuspidal algebra""; ""3.3 'Symmetric' and 'exterior'
                      powers""; ""3.4 Endomorphism algebras""; ""3.5 Standard modules""; ""4
                      Further connections and applications""; ""4.1 Base change""; ""4.2
                      Connecting Harish-Chandra induction with tensor products""; ""4.3 p-
                      Singular classes""; ""4.4 Blocks and decomposition numbers""; ""4.5 The
                      Ringel dual of the cuspidal algebra""; ""5 The affine general linear
                      group""; ""5.1 Levels and the branching rule from AGL[sub(n)] to GL[sub
                      (n)]""
