

1. Record Nr.	UNINA9910480523103321
Autore	Lochak P (Pierre)
Titolo	On the splitting of invariant manifolds in multidimensional near-integrable Hamiltonian systems // P. Lochak, J.-P. Marco, D. Sauzin
Pubbl/distr/stampa	Providence, Rhode Island : , : American Mathematical Society, , 2003
ISBN	1-4704-0373-0
Descrizione fisica	1 online resource (162 p.)
Collana	Memoirs of the American Mathematical Society, , 0065-9266 ; ; number 775
Disciplina	510 s 514/.74
Soggetti	Hamiltonian systems Invariant manifolds Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Volume 163, number 775 (second of 5 numbers)."
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	<p>""Contents""; ""Chapter 0. Introduction and Some Salient Features of the Model Hamiltonian""; ""Chapter 1. Symplectic Geometry and the Splitting of Invariant Manifolds""; ""A 1.1. Symplectic geometry: a short reminder""; ""A 1.2. Hyperbolic invariant manifolds""; ""A 1.3. Angles of Lagrangian planes: the symplectic viewpoint""; ""A 1.4. Angles of Lagrangian planes: the Euclidean viewpoint""; ""A 1.5. Symplectic isomorphisms, angles and splitting forms""; ""A 1.6. The splitting of Lagrangian submanifolds""; ""A 1.7. Lagrangian submanifolds in a cotangent bundle""</p> <p>""A 1.8. Hyperbolic tori and normally hyperbolic invariant manifolds"""" A 1.9. The perturbative setting""; ""A 1.10. Lagrangian intersections and homoclinic trajectories""; ""A 1.11. The splitting of the invariant manifolds of hyperbolic tori""; ""Chapter 2. Estimating the Splitting Matrix Using Normal Forms""; ""A 2.1. Resonant normal forms""; ""A 2.2. Computations in the vicinity of a resonant surface""; ""A 2.3. Splitting in a perturbative setting, variance and stability""; ""A 2.4. General exponential estimates for the splitting matrix""</p> <p>""A 2.5. Persistence of tori, invariant manifolds and homoclinic trajectories""""A 2.6. Splitting and stability""; ""Chapter 3. The Hamiltona€?Jacobi Method for a Simple Resonance""; ""A 3.1. Notation</p>

and assumptions"; "A 3.2. Formal solutions and the Hamiltona€?Jacobi algorithm"; "A 3.3. Convergence and domains of analyticity"; "A 3.4. Exponential closeness of the invariant manifolds"; "A 3.5. Linear versus nonlinear splitting"; "A 3.6. Some variants and possible generalizations"; "A 3.7. A short historical tour and some concluding remarks"
"Appendix. Invariant Tori With Vanishing or Zero Torsion"
Bibliography "
