

1. Record Nr.	UNINA9910480581103321
Autore	Pardon William <1947->
Titolo	Local surgery and the exact sequence of a localization for Wall groups / / William Pardon
Pubbl/distr/stampa	Providence, Rhode Island : , : American Mathematical Society, , [1977] ©1977
ISBN	1-4704-0157-6
Descrizione fisica	1 online resource (186 p.)
Collana	Memoirs of the American Mathematical Society ; ; number 196
Disciplina	514/.7
Soggetti	Surgery (Topology) Group rings Localization theory Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Volume 12, issue 2." Includes index.
Nota di bibliografia	Bibliography: pages 169-171.
Nota di contenuto	""Chapter Seven: Local surgery in the even-dimensional case""""Chapter Eight: The simply-connected case and a??[sub(1)] unrestricted""; ""Index of Symbols and Terminology""; ""Bibliography""

2. Record Nr.	UNINA9910785876603321
Titolo	Microbiological research and development for the food industry // edited by Peter J. Taormina
Pubbl/distr/stampa	Boca Raton : , : CRC Press, , 2013
ISBN	0-429-09408-6 1-4398-3484-9
Descrizione fisica	1 online resource (x, 345 p.) : ill
Classificazione	TEC012000
Altri autori (Persone)	TaorminaPeter J. <1973->
Disciplina	579/.16
Soggetti	Food industry and trade Food - Microbiology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	ch. 1. The case for microbiological research and development / Paul A. Gibbs, Peter J. Taormina, and Evangelia Komitopoulou -- ch. 2. Building research and development capabilities / Peter J. Taormina -- ch. 3. Food process validations / Margaret D. Hardin -- ch. 4. Food product validations / Peter J. Taormina -- ch. 5. Competitive research and development on antimicrobials and food preservatives / Keila L. Perez, T. Matthew Taylor, and Peter J. Taormina -- ch. 6. Competitive research and development on food-processing sanitizers and biocides / Junzhong Li and Scott L. Burnett -- ch. 7. Research during microbial food safety emergencies and contaminant investigations / Jeffrey L. Kornacki -- ch. 8. Predictive modeling : principles and practice / Peter Wareing and Evangelia Komitopoulou -- ch. 9. Detection and identification of bacterial pathogens in food using biochemical and immunological assays / Hari P. Dwivedi, Patricia Rule, and John C. Mills -- ch. 10. Microbiological growth-based and luminescence methods of food analysis / Ruth Eden and Gerard Ruth -- ch. 11. Nucleic acid-based methods for detection of foodborne pathogens / Bledar Bisha and Lawrence Goodridge -- ch. 12. Reporting food microbiology research outcomes / Mark Carter.
Sommario/riassunto	This book serves as a primer and reference for industrial food microbiologists who typically gain the information provided through

on-the-job experience or from a consultant instead of in the classroom. The intent is to describe the purposes and processes for conducting microbiological research and development. A broad range of topics is covered including the basics of setting up a food microbiology laboratory, procedures for validating the efficacy of process and product food safety controls, practices and protocols for developing effective food preservatives, sanitizers and biocides, approaches to responding to food safety emergencies, predicting survival and growth of microbes in foods, and approaches to meaningful communication of food microbiology research outcomes--
