

1. Record Nr.	UNINA9910480807703321
Titolo	Time in embodied interaction : synchronicity and sequentiality of multimodal resources // edited by Arnulf Deppermann, Jurgen Streeck
Pubbl/distr/stampa	Amsterdam ; ; Philadelphia : , : John Benjamins Publishing Company, , [2018] ©2018
Descrizione fisica	1 online resource (362 pages)
Collana	Pragmatics & Beyond New Series ; ; Volume 293
Disciplina	415
Soggetti	Grammar, Comparative and general - Temporal constructions Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	The body in interaction -- Chapter 1. Forward-looking -- Chapter 2. Suspending talk -- Chapter 3. The temporal organization of conversation while mucking out a sheep stable -- Chapter 4. Revisiting delayed completions -- Chapter 5. Questions on the move -- Chapter 6 Bodily shadowing -- Chapter 7. Prefiguring the future -- Chapter 8. Embodiment of activity progress -- Chapter 9. Changes in turn-design over interactional histories – the case of instructions in driving school lessons -- Chapter 10. Times of rest -- Index.
Sommario/riassunto	This is the first book dedicated to the study of the complexities that arise in embodied interaction from the multiplicity of time-scales on which its component processes unfold. It shows in microscopic detail how people synchronize and sequence modal resources such as talk, gaze, gesture, and object-manipulation to accomplish social actions. The studies show that each of these resources has its own temporal trajectory, affordances and restrictions, which enable and constrain the fine-grained work of bodily self-organization and interaction with others. Focusing on extended interactional time scales, some of the contributors investigate ways in which larger interactional episodes and relationships between actions are brought about and how actions build on shared interactional histories. The book makes a strong case for the use of video in the study of social interaction. It proposes an enlarged

vision of Conversation Analysis that puts the body and its interactive
temporalities center stage.
