

1. Record Nr.	UNINA9910480840103321
Autore	Pryor Adam
Titolo	Living with tiny aliens : the image of God for the Anthropocene // Adam Pryor
Pubbl/distr/stampa	New York : , : Fordham University Press, , 2020
ISBN	0-8232-8833-1
Descrizione fisica	1 online resource (287 pages)
Collana	Groundworks
Disciplina	233
Soggetti	Theological anthropology Exobiology - Religious aspects Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Front matter -- Contents -- Introduction: Being in Outer Space -- 1. Exoplanets and Icy Moons and Mars, Oh My! -- 2. Astrobiology's Intra-Active Aliens -- 3. Being a Living-System -- 4. The imago Dei as a Refractive Symbol -- 5. Conceptualizing Nature -- 6. The Anthropocene as Planetaryity in Deep Time -- 7. An Artful Planet -- 8. Living-Into Presence, Wonder, and Play -- Epilogue: Ad Astra Per Aspera -- Acknowledgments -- Notes -- Bibliography -- Index
Sommario/riassunto	Astrobiology is changing how we understand meaningful human existence. Living with Tiny Aliens seeks to imagine how an individuals' meaningful existence persists when we are planetary creatures situated in deep time—not only on a blue planet burgeoning with life, but in a cosmos pregnant with living-possibilities. In doing so, it works to articulate an astrobiological humanities. Working with a series of specific examples drawn from the study of extraterrestrial life, doctrinal reflection on the imago Dei, and reflections on the Anthropocene, Pryor reframes how human beings meaningfully dwell in the world and belong to it. To take seriously the geological significance of human agency is to understand the Earth as not only a living planet but an artful one. Consequently, Pryor reframes the imago Dei, rendering it a planetary system that opens up new possibilities for the flourishing of all creation by fostering technobiogeochemical cycles not subject to runaway, positive feedback. Such an account ensures the imago Dei is

not something any one of us possesses, but that it is a symbol for what we live into together as a species in intra-action with the wider habitable environment.
